These are your Oilmen

This is part of the team that works to supply oil for millions of people. Here are the geologists, surveyors, land men, riggers, drillers, pipe-line crews, refinery stillmen, traffic men . . . the Mobilgas dealer in your neighborhood.

The education and backgrounds of these men are as varied as their faces. But they, and their co-workers, have two important goals in common: to do a job well, and to further the progress of their industry.

This requires the combined skills of men working in business units of every size—from the independent service station proprietor to those working in a multi-million dollar refinery. Together, they supply two-thirds of the energy used in America. Together, they oil the wheels of progress.

Respected throughout the world for their part in peace and progress, these are the faces of the oil industry. These are oilmen.
